CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

Initial Authorization: 6 months

- ❑ Member must be 18 years of age or older

AND

- ❑ **If requesting Apokyn or apomorphine hydrochloride:** member has had an unsuccessful 30 day trial of *Inbrija™, *Nourianz™ AND ***Kynmobi** (*require prior authorization; chart notes must be submitted to document medication failures)

OR

- ❑ **If requesting Kynmobi™:** member has had an unsuccessful 30 day trial of *Nourianz™ (*require prior authorization; chart notes must be submitted to document medication failures)

AND

All criteria must be met below for Apokyn®, apomorphine hydrochloride, and Kynmobi™:

- ❑ Medication must be prescribed by, or in consultation with a neurologist

AND

- ❑ Member must have a confirmed diagnosis of Parkinson's disease in an individual who is having intermittent OFF episodes while on continuous carbidopa/levodopa therapy and all of the following criteria has been met: **(must submit chart notes)**
  - ❑ Provider have made adjustments to adjust the carbidopa/levodopa dose in order to manage symptoms without success

AND

  - ❑ Member is receiving concurrent therapy with carbidopa/levodopa **within the past 30 days AND** will be used in combination with continuous carbidopa/levodopa treatment

AND

- ❑ Member has had previous inadequate responses to or has been intolerant of at least **TWO** different classes of medications for the treatment of Parkinson's disease (e.g. monoamine oxidase type B inhibitor dopamine agonist, or COMT inhibitor

AND

- ❑ Member must be started on an anti-emetic 3 days prior to beginning treatment. Trimethobenzamide is the only antiemetic that has been studied and can be used with apomorphine

AND

(Continued on next page)

- ❑ Member is currently not taking a 5-HT3 antagonist such as Zofran (ondansetron), Kytril (granisetron), Aloxi (palonostron), Lotronex (alosetron), or Anzemet (dolasetron) which can result in profound hypotension and loss of consciousness **(pharmacy claims will be verified)**

AND

- ❑ Member has received a starting dose and did not develop clinically significant orthostatic hypotension

AND

- ❑ Member does not have hypersensitivity to apomorphine, any of its components or sulfa allergy

Reauthorization approval: 12 months. Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

- ❑ Must submit chart notes documenting a positive clinical response to therapy (e.g. continued success at reversing off-episodes, improved motor function)

AND

- ❑ Member continues to meet all initial criteria and has an absence of drug toxicity

Medication being provided by Specialty Pharmacy - PropriumRx

Not all drugs may be covered under every Plan

If a drug is non-formulary on a Plan, documentation of medical necessity will be required.

*****Use of samples to initiate therapy does not meet step edit/ preauthorization criteria.*****

****Previous therapies will be verified through pharmacy paid claims or submitted chart notes.****
