PHARMACY PRIOR AUTHORIZATION/STEP-EDIT REQUEST*

Directions: The prescribing physician must sign and clearly print name (preprinted stamps not valid) on this request. All other information may be filled in by office staff; **fax to 1-305-671-0200.** No additional phone calls will be necessary if all information (including phone and fax #s) on this form is correct. **If the information provided is not complete, correct, or legible, the authorization process can be delayed.**

Somatostatin Analog Drugs (PHARMACY)

Drug Requested: (select drug below)

<input type="checkbox"/> Bynfezia[®] (octreotide) SQ Injection	<input type="checkbox"/> Mycapssa[®] (octreotide) Oral Tablet
<input type="checkbox"/> Sandostatin[®] LAR Depot (octreotide)	<input type="checkbox"/> Signifor[®] (pasireotide) SQ Injection
<input type="checkbox"/> Somavert[®] (pegvisomant) Injection	

MEMBER & PRESCRIBER INFORMATION: Authorization may be delayed if incomplete.

Member Name: _____

Member AvMed #: _____ **Date of Birth:** _____

Prescriber Name: _____

Prescriber Signature: _____ **Date:** _____

Office Contact Name: _____

Phone Number: _____ **Fax Number:** _____

DEA OR NPI #: _____

DRUG INFORMATION: Authorization may be delayed if incomplete.

Drug Form/Strength: _____

Dosing Schedule: _____ **Length of Therapy:** _____

Diagnosis: _____ **ICD Code, if applicable:** _____

Weight: _____ **Date:** _____

****Somatostatin analog use for cancer treatment is outlined in NCCN guidelines for Neuroendocrine Tumors****

CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

(Continued on next page)

❑ Diagnosis: Acromegaly (Bynfezia, Sandostatin LAR, Somavert*)

Initial Authorization Approval: 12 months

- ❑ Patient is 18 years of age or older

AND

- ❑ Provider is an endocrinologist or neurosurgeon

AND

- ❑ Patient has undergone pituitary surgery and/or irradiation is contraindicated (**chart notes must be submitted to document diagnosis and surgical history or contraindication to surgery**)

AND

- ❑ Diagnosis confirmed by elevated IGF levels as well as inadequate suppression of growth hormone (GH) levels (**labs must be submitted for documentation**)

AND

- ❑ **For Sandostatin LAR and Somavert:** This medication will not be used in combination with other short-acting somatostatin analogs

AND

- ❑ **For Somavert only:** Medication requires trial and failure of a long acting injectable octreotide product (e.g., Bynfezia, Sandostatin)

❑ Diagnosis: Acromegaly (Bynfezia, Sandostatin LAR, Somavert*)

Reauthorization Approval: 12 months

- ❑ No toxicity has been observed while taking the requested medication

AND

- ❑ Response is demonstrated by both of the following (**Chart notes must be submitted for documentation**)

- ❑ Reduction of GH levels from pre-treatment baseline
- ❑ Normalization of IGF level

AND

- ❑ **For Sandostatin LAR and Somavert:** The patient has not had to use short-acting somatostatin therapy during treatment

(Continued on next page)

Diagnosis: Acromegaly (Mycapssa)

Initial Authorization Approval: 12 months

- Patient is 18 years of age or older

AND

- Provider is an endocrinologist or neurosurgeon

AND

- Patient has undergone pituitary surgery and/or irradiation is contraindicated (**chart notes must be submitted to document diagnosis and surgical history or contraindication to surgery**)

AND

- Diagnosis confirmed by elevated IGF levels as well as inadequate suppression of growth hormone (GH) levels (**labs must be submitted for documentation**)

AND

- Member must be established on an injectable somatostatin analogue for ≥ 6 months with a stable dose for ≥ 3 months and has shown a clinical response

AND

- This medication will not be used in combination with other short-acting somatostatin analogs

AND

- There must be a documented medical necessity for use of oral capsules over injectable alternatives (**chart notes must be submitted to document contraindication to injectable therapy**)

Diagnosis: Acromegaly (Mycapssa)

Reauthorization Approval: 12 months

- Member has not had to use short-acting somatostatin therapy during treatment

AND

- No toxicity has been observed while taking Mycappsa

AND

- Response is demonstrated by both of the following (**Chart notes must be submitted for documentation**)

- Reduction of GH levels from pre-treatment baseline
- Normalization of IGF level

(Continued on next page)

❑ Diagnosis: Carcinoid Syndrome (Bynfezia and Sandostatin LAR)

Authorization Approval: 3 months

- ❑ Patient has one of the following (**Chart notes must be submitted for documentation**)
 - ❑ Severe diarrhea/flushing episodes (carcinoid syndrome) related to hormone hypersecretion in neuroendocrine tumors
 - ❑ Prophylactic administration prior to induction of anesthesia in an individual with a functional carcinoid tumor
 - ❑ Prophylactic administration perioperatively to a surgical procedure in an individual with a functional carcinoid tumor

❑ Diagnosis – Diarrhea associated with Vasoactive Intestinal Peptide tumors (VIPomas) (Bynfezia and Sandostatin LAR)

Authorization Approval: 3 months

- ❑ Patient has profuse watery diarrhea associated with VIPomas (**Chart notes must be submitted for documentation**)

❑ Diagnosis – Cushing’s Disease (Signifor SQ)

Initial Authorization Approval: 6 months

- ❑ Patient is 18 years of age or older

AND
- ❑ Provider is an endocrinologist or neurosurgeon

AND
- ❑ Patient has diagnosis of Cushing’s disease and pituitary surgery is not an option or has not been curative (**chart notes must be submitted to document diagnosis and surgical history or contraindication to surgery**)

AND
- ❑ Patient’s baseline 24-hour urinary free cortisol level is greater than 1.5 times the upper limit of normal (**labs must be submitted for documentation**)

AND
- ❑ Current baseline labs are attached documenting all of the following: liver function tests, fasting plasma glucose, hemoglobin A1c, thyroid function, baseline ECG, and gallbladder ultrasound

(Continued on next page)

Diagnosis – Cushing’s Disease (Signifor SQ)

Reauthorization Approval: 12 months

- Patient’s current 24-hour urinary free cortisol level is below the upper limit of normal mean (**labs must be submitted for documentation**)

AND

- Current labs documenting patient’s liver function, fasting plasma glucose and hemoglobin A1c are attached

AND

- Improvements in blood pressure, triglycerides, low-density lipoprotein cholesterol, weight and health related quality of life have been maintained while on Signifor therapy (**Chart notes must be submitted for documentation**)

Diagnosis: Other

Please submit documentation showing medical necessity

Medication being provided by Specialty Pharmacy - PropriumRx

Not all drugs may be covered under every Plan

If a drug is non-formulary on a Plan, documentation of medical necessity will be required.

Use of samples to initiate therapy does not meet step edit/ preauthorization criteria.

Previous therapies will be verified through pharmacy paid claims or submitted chart notes.
