

Prescription Synchronization (Member)

On September 1, 2017, AvMed launched the new “Medication Synchronization” program for all commercial (non-Medicare) Members. This new program offers Members the ability to align the refill timing on multiple prescriptions so that they can be more conveniently filled on the same date.

The Benefits:

By synchronizing your prescriptions you will eliminate repeated trips to the pharmacy each month, saving you the time and money, as well as reduce the confusion over when a specific prescription is due to be filled.

The Process:

The program is very simple and can be used at any Participating Pharmacy within the AvMed Network. **In order to synchronize your prescription, just ask your pharmacist.** The program is designed to calculate a “daily cost sharing rate” of your medication and provide you with the appropriate days supply so that you will complete each medication fill on the same date. Note: “daily cost sharing rate” means you will only be charged a copay based on the number of days for which the prescription is filled instead of the full 30-day supply copayment.

If you experience any issues at the pharmacy while attempting to synchronize your prescriptions, please ask the pharmacist or pharmacy technician to contact the CVS/caremark Pharmacy Help Desk.
